Battle & Storm

Steps	Battle Procedure (4.4.1-4.4.5)	Storm Procedure (4.5.2)
Array Lords Play Events	Active Attacking Lord Front center, then any one each left/right, others Reserves. Defenders center then left/right, opposing each Attacker as able. (See also Sally, Relief Sally.) Attackers then Defenders play Events .	Array as for Battle but only Active Attacking Lord and any one Defender in Front; rest in Reserve. Defender: place Garrison (see Strongholds). Attacker: place Siegeworks as Walls.
Concede? Reposition	Concede Field? Attacker then Defender may declare this Round as last, enemy Pursuit . Reserve Lords advance into any empty Front. Attacker then Defender: Left or right to empty center . Front Lords with no enemy opposite: Flank closest.	Concede? If after Round 1, Attacker may end Storm now as the loser. Reposition? If after Round 1, Attacker then Defender may advance one Reserve Lord to add to Front Lords, up to Capacity of Stronghold (1, 2, or 3).
Strike Each Strike step:	1. Missiles: a. Defenders 1. a.b. b. Attackers 2. Melee: a. Defending Horse b. Attacking Horse c. Defending Foot d. Attacking Foot thrown?	1. Missiles: a. Defenders 1. a.b. b. Attackers 2. Melee: a. All Stronghold Defenders b. All Attackers thrown? Melee: max 6 Hits/Lord
Hits	x1/2 vs Pursuit round up Each unit causes 1/2, 1, or 2 Hits —see Forces table. Total all (opposite, Flanks, Garrison) and round up . Roll any Walls . Battle : Lord opposite/Flanking/Flanked takes Hits (owner selects which first). Owner assigns Hits to units. Roll 1 Protection per Hit (failure Routs unit). Storm : Attacking Armored take Hits first. Garrison takes Hits before Defending Lords.	
Protection	Walls: Targeted side rolls 1 die per Hit; each roll within range cancels 1 Hit. Armor: Unit absorbing Hit rolls; within range absorbs 1 Hit without Rout. Evade: Roll as for Armor (above) but not if Missile Hit or during Storm. Unarmored: If no Armor or Evade (and not Serf), roll of "1" absorbs Hit without Rout.	
Rout	Routed units immediately slide back on mat; Routed Garrison and Serf units are removed. Routed units may not Strike or absorb Hits. When all of a Lord's units Rout, the Lord Routs —immediately take him off the Array.	
New Round?	If all Lords of a side Routed or it Conceded the Field, that side loses the Battle. If not, begin new Round at Concede?/Reposition above.	If all Attackers or Defenders Routed, that side loses . If not and Rounds so far = Siege markers, Attacker loses. Otherwise, new Round with Concede?/Reposition .
Retreat Withdraw Conquered	Losers Retreat where no Unbesieged/Unbypassed enemy (Defenders not Way enemy came, Attackers to origin), OR Withdraw into Friendly Stronghold (Sally must), OR are permanently removed.	If Besieged Defenders lose, the Stronghold is Sacked —all Lords inside are permanently removed and award Spoils; Attackers Conquer the Stronghold. Otherwise, Siege continues (no Retreat or Spoils).
Losses	All Lords' Routed units each roll—failed roll removes unit: — Retreated without Conceding or Attacker in Storm roll as if Protection "1". — Others roll against unmodified Protection (Armor, Evade, or Unarmored). Any Lord with all units Removed is permanently removed.	
Spoils	Winners take from Losers who —Retreated without Conceding or were permanently removed: all Assets . —Conceded and Retreated: Loot plus excess Provender so Retreat not Laden.	As in Battle (at left), plus Conquered Stronghold yields Assets per Strongholds table
Service	Roll a die for each Retreating (not Withdrawing) Lord: Shift that Lord's Service [and his Vassals'] left by number of boxes equal to 1/2 die roll, rounded up.	
Aftermath	Mark all Lords Moved/Fought. Discard any "Hold" Events used at this Battle or Storm. If Battle starts Siege, add 1 marker; if lifts Siege, remove markers. If Sally Raid (4.5.3), reduce Siege to 1 marker. If Stronghold changed hands; adjust Conquered/Jihad/Ravaged/VP (1.3.1, 1.4.4, 4.5.1). Recovery : No more Actions on this Command card—go to Feed/Pay/Disband (4.8).
